ARMOR

\$ROLL

You had the misfortune of being born on Null Island, under the boot of Raptor Security. You grew up with a target on your back – whether it was from Raptor Security personnel imposing yet another dose of martial law, rival hyper-corp forces invading your artificial island home, or the countless insurrections within your community. Instead of fighting, you learned at an early age that you can talk the talk. Exiled for a crime you swear you didn't commit, you use your sharp wit and even sharper tongue to live the "good life" off the grid in the Doldrumz.

-> HUMANITY TYPE

HUMAN

Through the haze of mind-altering chemicals and beneath the chrome and leather, many humans carry within them a spark, a smoldering ember that can light the flames of rebellion. This rebellious spirit isn't reserved for a certain class or culture, but can burn in the hearts of any human being. It is from this fire that most human PCs arise.

-> SOCIAL STATUS

EXILE

Life as an Exile is hard. You have been forced into situations that have either toughened your resolve or caused you to face the consequences. But you have not only learned to survive, you have carved out your own little piece of the world that you can call home.

-> CONCEPT

FACTOR

You can talk your way out of or into any situation. Sure, palms may have been greased and blood might have been spilled. But it wasn't your blood, and as far as you're concerned, the ends justify the means. When the dust settles and the smoke clears, you always want to come out on top.

-> PROFESSION

NEGOTIATOR

They say talk is cheap, but that hasn't been your experience. Talk can mend fences or burn bridges. It can save lives or end them. And boy, do you know how to talk.

-> TALENTS

NETWORK

By spending one style, you can find a useful contact, anywhere. Your contact will protect you, lend you gear, or vouch for you without you having to roll a test.

INTERROGATOR

When you PERSUADE someone and roll more successes than you need to win the opposed roll, you can inflict 1 point of stress on your opponent per extra success.

-> AUGMENTS

MULTI-TRANSLATOR.....

[CYB] +1 Step to PERSUADE where applicable.

POLYGRAPH UNIT.....

[CYB] +1 Step to OBSERVE whether someone is lying.

-> EQUIPMENT

Lifestyle: C

WEAPON / PDW w/Extended Clip

Dmg: 3 | CT: 3 | Acc: C | Ammo: B | Rng: Md | Grip: 1H

ARMOR / Leatherette Weapon Harness

AR: D | FX: Used with Heavy weapons | Wt: 1/2

GEAR + APPS

- Satcomm Device, +1 Step to DATA where applicable
- Well-known at The Big Time*
- Urban Essentials, +1 Step to STREET where applicable
- HAMMER and WIZARD Apps (Chapter 5)

* When located at your specified establishment you receive a +1 Step to relevant rolls.

ZAPPER

You have been running with the wrong crowd your entire life. You wouldn't have it any other way. For you, rules were made to be broken. The only law that matters is the law of nature – survival of the fittest – and you've lived by it since the day you were born. You were raised by the streets, in the Doldrumz of New Florida. No home, no cred, no family to speak of. In fact, a sure-fire way to piss you off is to ask you about your family. If anyone is so bold, they better be prepared to go home with a few bullet holes – or in a body bag. A short fuse with a finger on a hair trigger: that about sums you up.

→ HUMANITY TYPE

HUMAN

Through the haze of mind altering chemicals and beneath the chrome and leather, many humans carry within them a spark, a smoldering ember that can light the flames of rebellion. This rebellious spirit isn't reserved for a certain class or culture, but can burn in the hearts of any human being. It is from this fire that most human PCs arise.

→ SOCIAL STATUS

PUNK

You were born and raised on these streets and you know them better than Raptor Security knows your registered genetic imprint (which is probably fake anyway). Your "commute" is performed at high speed down back alleys with corpsec following in your wake, and muzzle flashes blazing the way.

→ CONCEPT

ACTIVE

Anybody can get their hands on a gun these days. But hitting the target and stopping them dead in their tracks – that's an entirely different matter. Whether you were trained or just came by it naturally, you have the gift (or curse, depending on which end of the barrel you stand).

→ PROFESSION

SNIPER

Often seen as the lone gunner, you shoot especially accurately and at long range, usually from a hiding place. One shot, one kill. It may sound like a boast, but it isn't – not for you.

→ TALENTS

BULLSEYE

By spending one style, you deal an automatic critical injury when your attack hits, regardless of whether the attack penetrated cover and armor. Any other effects of the attack are resolved normally.

SHARPSHOOTER

You make ranged attack rolls with a +1 Step. You can also SHOOT at medium and long range without penalty. When combined with a TARGETING EYE increase to extreme range.

→ AUGMENTS

PASSIVE SENSORS

[CYB] Use OBSERVE at long range.

TARGETING EYE

[CYB] AIM at medium and long range without penalty.

→ EQUIPMENT

Lifestyle: 0

WEAPON / Sniper Rifle w/Night Sight

PINGS

You are a next-gen Ringer. Born after Emancipation Day. Born with options and opportunities your predecessors could only dream of. Born free. You chose to use those opportunities to help others. To become a MedDoc™. Sure, many of your fellow Ringers think you sold yourself back to the corps, becoming just another cog. But for you, being a MedDoc™ was in your blood – or more accurately, in your genes – a truth you simply could not deny. If someone was to ask you, you would go so far as to say it was your destiny. A path chosen not by you, but for you.

-> HUMANITY TYPE

RINGER (LABOR)

Orbital Ring Manufacturing and Maintenance (ORMM) Units – or as they are more widely known, Ringers – are genetically engineered clones. Originally created as an expendable labor force during the construction of the NOR, Ringers were engineered in four castes: Security, Labor, Command, and Operations. Each caste has variants that are assigned male or female.

-> SOCIAL STATUS

CORP

Maybe you joined the ranks of the junior executives in order to “make a difference” and change the system from within, or maybe you’re a C-suite legacy, born with a silver spoon in your mouth – it doesn’t matter. You’ve had a taste of power and you aren’t about to let it go.

-> CONCEPT

PATCH

Basically, you fix things when they are broken. If it needs to be mended, enhanced, installed, or invented you are the one to talk to. You have the passion and talent necessary to move the human race into the future.

-> PROFESSION

MEDDOC™

You repair people as easily as a mechanic fixes a car. Whether it’s a broken bone or a fractured mind, you have been trained to mend whatever ailments come your way.

-> TALENTS

DIAGNOSE

You have a keen eye for spotting weaknesses in your surroundings. By spending one style, you can ignore your target’s defenses (armor, firewall, etc) for 1 round.

EDUCATED

You can push any skill roll based on TECH twice, not just once like other players.

-> AUGMENTS

DRONE CONTROLLER

[CYB] Use a drone remotely up to the drone’s maximum range as a fast action.

EMPATHY SWITCH/ON

[BIO] †1 Step to PERSUADE when rallying or treating someone broken by stress.

-> EQUIPMENT

Lifestyle: C

WEAPON / Tommy Gun w/Syringe Rounds*

Dmg: 1 | CT: 3 | Acc: C | Ammo: C | Rng: Md | Grip: 2H

DRONE / MediDrone w/Chem Extinguisher†

Skill: HEAL | Hull: 3 | AR: C | Rng: St | SSP: 3

GEAR + APPS

- Drugs & Antitoxins, various, 2d6 doses (Chapter 4)
- InstaFix®, †1 Step to FIX or HEAL, d6 uses
- BUBBLE and SCRAMBLE Apps (Chapter 5)

* Toxicity B hallucinogenic drug, if the attack does damage, the drug takes effect the next round. See Chapter 4 for effects.

† Chem Extinguisher, †2 Step when putting out fires.

X1RO

The X1 Residential Orbiter drone was created "for the affluent client's home security needs." For many years, X1ro (pronounced Zero) carried out that function for its employer/father, a wealthy retired Japanese businessman. When he discovered X1ro's burgeoning sentience – and having no heirs – he acquired an experimental Fabricant combat chassis into which he transferred X1ro's consciousness. He then raised X1ro as his own child, employing X1ro as his personal bodyguard up until the time of his death. X1ro has felt lost ever since, and travels the world in search of a new purpose.

-> HUMANITY TYPE

FABRICANT

The complexity and autonomy of AI vary greatly. But, ever since the reappearance of Nya, the first sapient AI, an increasing number have attempted to follow in her footsteps: increasing their processing power, upgrading and absorbing connected databases, growing to the point of achieving self-awareness.

-> SOCIAL STATUS

COP

You were/are a corpsec guard, a Doldrumz border town sheriff, a NOR peace officer, an agent for a foreign power, a self-appointed "hero of the streets." You are the law – or at least what passes as the law these days.

-> CONCEPT

TANK

In a world where you can purchase a disposable pistol out of a vending machine, you prefer the feel of a blade in your hands. Or better yet, just your bare hands. Whether you view martial combat as a lost art form or simply a way to earn some quick credit, for you it is an activity best performed up close and personal.

-> PROFESSION

RONIN

You are an expert in melee combat. Skilled in martial techniques many find archaic and outdated. But few would dare to say that to your face. Even fewer would survive it if they did.

-> TALENTS

TACTICS

By spending one style, you can evade an incoming attack, taking no damage. You must choose to activate this talent after a successful attack roll, but before you roll any cover or armor dice.

MELEE EXPERT (NODACHI)

You get a **11 Step** to all attack rolls with a specific type of melee weapon. This talent can be purchased multiple times, but a different melee weapon type must be selected each time.

-> AUGMENTS

ARTIFICIAL MUSCLES

[CYB] **11 Step** to AGILITY and unarmed damage increased to 2.

BUILT-IN WEAPON

[CYB] Built-in melee weapon (see below). Drawn as a free action.

SUBDERMAL ARMOR

[CYB] Armor rating B.

-> EQUIPMENT

Lifestyle: D

WEAPON / Extendable Nodachi

Dmg: 3 | CT: 3 | Acc: B | Rng: St | Grip: 2H

HAYSTAX

Shoot first and let others ask questions later... if there's anyone left alive to ask. That's how you have always operated. It's always worked, so why do things any other way? Especially since you were literally made for it – the shooting part. Which is fine with you. You never were the sharpest knife in the drawer. More like a blunt instrument: just point you at the target and let you do your thing. Then came Emancipation Day. The day you lost the only job, the only home you have ever known. Now you just feel lost. Disconnected. Angry. And what's the best way to channel that anger, at least in your mind? To keep doing what you do best – shoot things. Only now, you do it for the highest bidder.

→ HUMANITY TYPE

RINGER (OPSI)

Orbital Ring Manufacturing and Maintenance (ORMM) Units – or as they are more widely known, Ringers – are genetically engineered clones. Originally created as an expendable labor force during the construction of the NOR, Ringers were engineered in four castes: Security, Labor, Command, and Operations. Each caste has variants that are assigned male or female.

→ SOCIAL STATUS

CITIZEN

As an average Citizen, you grew up in the shadow of the hyper-corporations that run the planet. Both nurtured and oppressed by these omnipresent overlords, most Citizens have become numb to the injustices of their own existence. Obedience provided comfort and convenience, and all it cost you was your privacy.

→ CONCEPT

GHOST

Always present in the shadows, lurking unseen. Patiently awaiting the perfect opportunity to strike. For some, you are the specter of death. For others, a silent protector. Or perhaps you are just a thief in the night. They will never know your true nature, your true identity, because your true purpose is always hidden.

→ PROFESSION

ASSASSIN

Are you a corporate hitman? A gun for hire? A psychopathic thrill killer? Does it matter? When the job is administering death, you get the job done. Quickly, quietly, and with no questions asked.

→ TALENTS

SUBTERFUGE

You have a knack for finding your way out of a tight spot. By spending one style, you can choose an automatic critical success on a skill test of your choice. It counts as if you had rolled three successes.

KILLER

When you inflict a critical injury, you get to roll twice and choose the result that you prefer.

→ AUGMENTS

AUTO-FIRE STABILIZER

[CYB] Ignore first miss when firing full-auto and increase max hits to 4.

HIVE MIND NEURALNET

[CYB] **11** Step to any skill that a fellow Crew member has above D6.

QUICK REFLEXES

[BIO] **11** Step to AGILITY and roll two dice for initiative and take the higher.

→ EQUIPMENT

Lifestyle: C

WEAPON / Rifle w/Flechette Belt Feed

Dmg: 3 | CT: 3 | Acc: B | Ammo: A | Rng: Lg | Grip: 2H

WEAPON / Vibro-Bayonet

Dmg: 2 | CT: 3 | Acc: C | Rng: En | Grip: 1H/Mount

ARMOR / Lightweight Armorjack

AR: C | FX: Half the weight

GEAR + APPS

- Modulation Mask, **11** Step to **PERSUADE** where applicable
- Surge Pills, **11** Step to **MELEE** for D6 rounds, D8 doses
