

INTRODUCTION

In a roleplaying campaign, there are inevitably periods between adventures. The purpose of Cthulhu Eternal Downtime Events Generator is to help you bring that downtime to life. Does your private eye sleuth take on an endless stream of infidelity cases, shadowing and taking pictures of secret lovers? Does your renowned professor go on a research trip around the world? Does your mentally fragile writer suffer a nervous breakdown? Are their private lives simple and happy or do they take a darker, more sinister turn?

The Downtime Events Generator is a collection of lists with random events. A story will emerge based on the choices you make for your character and the roll of the dice. The story of your character's private life. The ups and downs of his or her career, or love life. If your Game moderator allows it, the events may lead your character down an unexpected path, perhaps even to madness and death.

CORE CONCEPTS OF CTHULHU ETERNAL

The Downtime Events Generator is created for use with Cthulhu Eternal. It is compatible with most d100-based roleplaying games that are Cthulhu-related and take place in the inter-war period.

The Cthulhu Eternal rules are free to use under an Open Gaming License. The complete rules can be downloaded for free here:

<https://www.drivethrurpg.com/en/product/384109/cthulhu-eternal-jazz-age-srd>

For those who wish to use the Downtime Events Generator with other RPG systems, there is a need to understand some of the core concepts and terminology of Cthulhu Eternal. They can be adapted or translated to other d100 systems.

The following description of the core concepts is a heavily abridged version of the original Cthulhu Eternal SRD rules text.

GM, PROTAGONIST, NPC

As with most tabletop roleplaying games, when playing Cthulhu Eternal one **player** takes on the responsibility of **setting the scene** and narrating the events which make up a Cthulhu Eternal adventure. That individual is termed the **Game Moderator**. All other players take on the **roles** of individual everyday people who are swept up in investigating the Cthulhu Mythos. These characters are called **Protagonists**. Protagonists will encounter a multitude of other characters whose roles are not being played by other players – those characters are called **Non-Player Characters** (or **NPCs**) and their actions are controlled by the Game Moderator.

STATS

Every Protagonist has six core **statistics** (or “**stats**” for short). These are described on a scale of 3 to 18 with the higher the better. Monsters and entities may have scores that are outside those limits.

Strength (STR); Physical power, size, and musculature.

Constitution (CON); Health and physical resilience.

Dexterity (DEX); Agility, coordination, and nimbleness.

Intelligence (INT); How well a Protagonist notices, remembers, and connects information.

Power (POW); Force of personality, motivation, and psychic resilience.

Charisma (CHA); Charm, leadership, and personal appeal.

DERIVED ATTRIBUTES

Derived attributes are ratings based on the Protagonist's stats. These are Hit Points, Willpower Points and Sanity Points.

Hit Points (HP); How much physical damage the Protagonist can sustain.

Willpower Points (WP); The mental fortitude of the Protagonist.

Sanity Points (SAN); The mental health of the Protagonist.

SKILLS

A **skill** represents expertise gained with intensive training or study. All skills have a skill rating, a percentile number ranging from 0% to 99%, describing how proficient the Protagonist or NPC is with the skill in question. Skills improve through practice and experience.

The following skills are used by Protagonists and NPCs in Cthulhu Eternal. For a detailed description of each skill, please refer to the Cthulhu Eternal rules (as mentioned earlier, they are free).

- Administration
- Alertness
- Anthropology
- Appraise
- Archeology
- Art (Type)
- Athletics
- Charm
- Craft (Type)
- Disguise
- Dodge
- Drive
- Firearms
- First Aid
- Foreign Language (Type)
- Harangue
- Heavy Machinery
- History
- Insight
- Law (Type)
- Medicine
- Melee Weapons
- Military Training (Type)
- Natural World
- Navigate
- Occult
- Persuade
- Pilot (Type)
- Psychoanalyze
- Regional Lore (Type)
- Research
- Ride
- Science (Type)
- Search
- Social Etiquette
- Stealth
- Streetwise (Type)
- Surgery
- Survival (Type)
- Swim
- Track
- Unarmed Combat
- Unnatural
- Use Gadgets

TESTS AND PERCENTILE DICE ("1D100")

Actions in Cthulhu Eternal are resolved using **percentile dice**. That means you roll two ten-sided dice to get a number from 1 to 100. If the Game Moderator tells you to roll a skill, it's a **skill test**. The dice determine success or failure. Roll the relevant skill test rating or lower to succeed. Rolling higher than the skill test rating means failure.

Stat tests are typically the relevant stat x 5. For example, a Strength test for a Protagonist with STR 11 would be 55% ($11 \times 5 = 55$).

A test can be an **opposed test**. This occurs when two skills compete against each other. In an opposed test, the side that rolls the highest dice result but still succeeds wins the test.

A simple example would be a Protagonist trying to drive faster than an NPC in a street race - this would be an opposed test of their respective driving skill. Whoever rolls the highest result but still succeeds (if both fail, whoever fails the least) with the skill test wins the street race.

RESOURCES

Every Protagonist has a **Resource rating** between 0 and 20. This number is an abstract measure of status and wealth. A Protagonist who is "wealthy" in a material sense will have a high Resource rating. The Resource rating does not describe how well-liked the Protagonist is. Wealthy people may have clout, but not necessarily friends or respect.

The Resource rating may change over time, reflecting the ebb and flow of the Protagonist's status and wealth. The full value is called the **Protagonist's Permanent Resources rating**. Based on the rating, a Protagonist will have a number of "at hand", "stowed" and "in storage" resource points. The sum of which amounts to the Permanent Resources Rating. The numbers are an abstraction of how much savings or resources the Protagonist has readily available, in their hotel room or stored back home.

Protagonists will have a number of **Resource Checkboxes** based on the Permanent Resources rating. The number of Resource checkboxes will be in the range of 0 to 3.

The events of the Downtime Events Generator may affect the Resource ratings of the Protagonist. Sometimes for the better, sometimes for the worse.

RESOURCE TESTS

The Permanent Resources rating or any of the "at hand", "stowed" and "in storage" resource points may be used in a **Resource test**, akin to a Skill test. The chance of success is determined by the GM but may be anything from the relevant Resource rating x 5 down to x 0.25 (a quarter of the value).

If the test is successful, the Protagonist checks off one of the Resource Checkboxes on the Protagonist's character sheet. When all the boxes are full, the Protagonist's pool of resources is temporarily exhausted until the Protagonist has had time to replenish or reorganise. If the Protagonist has no currently unchecked checkboxes, the Resource test automatically fails.

BONDS

Bonds measure the Protagonist's relationships with vital people and societies in his or her life; loved ones, family members, and wider communities. Bonds have a score from 0 to 20, the higher the better. There are two distinct types of Bonds, each handled slightly differently - **Individual Bonds** and **Community Bonds**.

An Individual Bond is an emotional connection to a single person. It could be familial or marital, or it could just be a close friendship or association. To qualify as an Individual Bond the person must be someone the Protagonist believes to be real and still alive. A Protagonist can have more than one Individual Bond, each describing the status of an important relationship.

A Community Bond is a relationship between the Protagonist and a broader community of individuals; it reflects the Protagonist's status within that community and the likelihood of other people following his or her instructions or desires. A Protagonist can have more than one Community Bond.

When a Bond is reduced to 0, the relationship is damaged beyond repair. Bonds often fall apart because of events beyond your Protagonist's control. A Protagonist's partner might break up the relationship. A new community leader might ascend

to power who is actively antagonistic towards the Protagonist. And so on.

Likewise, Bonds can be established through the actions of a Protagonist or by chance. New relationships will be formed over time. The ups and downs of Individual and Community Bonds are a natural consequence of the Protagonist's progression through life.

Many of the events of the Downtime Events Generator will affect the Bonds of the Protagonist. Sometimes for the better, sometimes for the worse.

VIGNETTES AND PERSONAL PURSUITS

A **Vignette** is a short roleplaying scene that focuses on a single Protagonist in between adventures. A Vignette typically explores important events in a Protagonist's private life.

For each Vignette, the player chooses a **Personal pursuit**. An objective for the Protagonist. If, for example, the Protagonist is attempting to improve an Individual Bond. The player will, in dialogue with the Game moderator, make a skill or stat test to ascertain the outcome. It can also be resolved through a short roleplaying scene.

In many ways, the stories generated with the Downtime Events Generator supplants the mechanics of the Vignette and Personal pursuits. But there is nothing to stop the Game Moderator from using it to augment a Vignette concept or to use them both side by side.

ACCOUNTS OF THE UNNATURAL

Mythos accounts are sources of Cthulhu mythos knowledge. This usually comes in the form of a book, letters, scrolls, clay tablets or the like. Studying a Mythos account requires a skill of at least 20 % in the relevant **Language**. It also has a **Study time**. The below table lists some examples:

Mythos account	Language	Study time
Azathoth and other Horrors	English	Days
Book of Dzyan	Senzar / English	Weeks
Brick Cylinders of Kadatheron	Language of the Dreamlands	Months
CTHULHU CULT (Angell's Files)	English	Days
Daemonolatryiae Libri III	Latin	Weeks
Ilarneke Papyri	Language of the Dreamlands	Weeks
The King in Yellow (play)	English	Hours
Liber Damnatus Damnationum	Latin	Weeks
The Nameless Book	Latin	Weeks
The Necronomicon	Arabic / Greek / Latin / English	Weeks or Months
Pnakotic Manuscripts	Latin / Greek / Language of the Dreamlands	Weeks or Months
The Scientific Notes of Dr. Herbert West	English	Days
The Seven Cryptical Books of Hsan	Chinese / Language of the Dreamlands	Days or Weeks

Each Mythos account has an associated amount of Unnatural skill gain that it might potentially impart. Simple accounts of the Cthulhu Mythos might impart +1 % to +3 %, while weighty records, like for example the infamous Necronomicon, might offer the reader +15 % or more points of increase in Unnatural.

In addition to learning about the Unnatural, successful research might improve other knowledge-based skills as well. These may be Occult, History, Archeology, Regional Lore, Anthropology, Art or Craft. Secondary skill gains are usually small.

Each Mythos account usually has a SAN cost associated with studying it. If the Protagonist gains skill from the studies, he or she must also lose SAN.

CORE CONCEPTS OF THE CTHULHU ETERNAL DOWNTIME EVENTS GENERATOR

The basic currency of downtime is time. Events take time to play out and come to a meaningful conclusion. For each full week of meaningful downtime between adventures, the Protagonist is given 1 **Downtime point**. For example, 4 weeks of downtime is equal to 4 Downtime points. These points are spent on **Downtime activities**. Some Downtime activities are more time-consuming than others and therefore cost more Downtime points. Some Downtime activities may have additional costs. For example, studying may come at a financial cost as well.

The chosen downtime activity decides what random table the player will use to generate an **Event description**. The Event description is essentially one or two sentences with blanks describing an **Event**. By making choices and a few random rolls on **Event tables**, and perhaps a skill test or two, the blanks in the Event description will be filled out. At the end of the process, a **Story** will have been created. The Story describes what happens during the **Event** and if any consequences affect the Protagonist.

Once the Protagonist has spent all of his or her Downtime points, the passage of time has led him or her to the start of the next adventure of the campaign. Depending on the length of the downtime, the Protagonist may have experienced several Events. Some will be mundane and harmless, some may be dangerous and mysterious, setting up **Adventure hooks** that the Game Manager can weave into the current campaign.

Some results on the Event tables are marked with a (☠) symbol. These are **Dangerous results** that may have consequences that are negative for the Protagonist. She may get hurt, hospitalised, go insane or even die. Do not attempt to resolve Dangerous results without the approval of your Game Manager. Unless both of you approve of taking the risk, reroll on the Event table until a result comes up that is not a Dangerous result.

THE DOWNTIME FORM

At the end of the Downtime Events Generator is a **Downtime form** that can be used for recording the Downtime events of your character. Make several printouts of the form or make photocopies of it. It will help you remember and make sense of the events.

LIVING A “NORMAL” LIFE BETWEEN ADVENTURES

Many Protagonists will want to return to a normal life between adventures. You may wonder why there isn't a “*Lead an ordinary life*” Downtime activity. But when you think about it, much of our normal lives are centred around our worklife (Community Bond with our place of work) or our relationships with friends and family (Individual Bonds). Leading a normal life usually means spending Downtime points on improving Community Bonds or Individual Bonds. It may also include trying to improve a Skill or Stat through studies or exercise.

STEP 1: CALCULATE DOWNTIME POINTS

Your Game Manager will decide how many weeks of downtime will pass until the protagonist's next adventure. For each full week of meaningful downtime between adventures, the Protagonist is given 1 Downtime point. Sum them up and note them on the

Downtime form. Deduct points as they are spent on Downtime activities until your Protagonist can't afford to pay for more activities this time around. Also, note the in-game start and end date of each event.

STEP 2: FILL OUT THE PERSONALISED INFORMATION ON THE DOWNTIME FORM

When using the Downtime form, you need a pencil and some paper ready for taking notes. You will be managing a lot of information, and taking notes helps. Even Einstein took notes, you know.

STEP 3: CHOOSE A DOWNTIME ACTIVITY

Pick a Downtime activity and deduct the cost from the unspent Downtime points of the Protagonist. If you can't make up your mind, you can randomise the choice of activity by rolling a die.

Find the random table that corresponds to your chosen Downtime activity. Roll on the table to decide the Event description for your activity. As noted earlier, the Event description is a sentence with missing information for you to fill out. The Event description is the bare bones of the Event. By adding randomly generated information it will be fleshed out to become a Story that describes what happens to your Protagonist.

STEP 4: MAKE THE REQUIRED ROLLS ON EVENT TABLES

Once you have the Event description you will be making rolls on the Event table listed within brackets to fill out the gaps. References such as [the Protagonist], [Community Bond] or [choose a relationship] require you to fill in information from the Downtime form. References like [Mysterious Stranger] or [Positive Emotion] require you to roll on the corresponding table. The reference [chosen relationship], [chosen Skill] and similar, refers to the previous choices when resolving the Event.

Follow the instructions on the results and make skill tests as required. Remember that you have the option to reroll if you happen on a dangerous result (☠). Only resolve dangerous results if both you and the Game Moderator agree to do so. Just be prepared to live (or worse) with the consequences of the outcome.

STEP 5: FINISHING TOUCHES AND BACK TO STEP 3

When an Event description has been fleshed out to become a Story, there may be some minor details to polish before it is complete. Perhaps you want to write a more detailed account of what happened, or perhaps you need to consider the repercussions of the Event. For example, if your Protagonist is a renowned professor who finds himself sent to an insane asylum, he may perhaps lose his position at the University as a consequence. Discuss suitable repercussions with your Game Manager.

When you are both happy with the Story of the Event, go back to step 3 and choose a new Downtime activity until your Protagonist can't afford to pay for more activities. When your Protagonist is out of Downtime points, the Protagonist is ready to start the next adventure in your campaign.

THE TABLES

DOWNTIME ACTIVITIES

DOWNTIME ACTIVITY (CHOOSE OR ROLL 1D100)

Roll	Activity
1 - 9	Improve an existing Individual Bond (Cost: 4 Downtime points)
10 - 18	Replenish Resources (Cost: 1 Downtime point)
19 - 28	Heal and recuperate (Cost: Downtime points equal to HP healed (may be less points than fully healed))
29 - 37	Improve an existing Community Bond (Cost: 4 Downtime points)
38 - 46	Study forbidden tomes to increase Unnatural (Cost: Variable)
47 - 55	Learn eldritch incantations (Cost: Variable)
56 - 64	Meet new people (Cost: 5 Downtime points)
65 - 73	Join new groups (Cost: 5 Downtime points)
74 - 82	Improve mental health (Cost: 8 Downtime points)
83 - 91	Improve a Skill (Cost: 8 Downtime points)
92 - 00	Improve a Stat (Cost: 8 Downtime points)

TABLE COLLECTION: EVENTS

IMPROVE AN EXISTING INDIVIDUAL BOND (1D100)

After completing the Story, improve the Individual Bond by 1D3 (up to the Protagonist's CHA).

Roll	Result
1 - 10	[the Protagonist] and [choose a relationship] spend a lot of time [Male Pastime or Female Pastime] the following days. They find it [Positive Emotions] and enjoy each other's company.

Roll	Result
11 - 20	By chance [the Protagonist] and [choose a relationship] run into an old acquaintance at the local [City Location], now a renowned [Academic Profession]. They spend a nice afternoon [Male Pastime or Female Pastime].
21 - 30	[the Protagonist] and [choose a relationship] become witnesses of a [Criminal Pastime]. The event fills them with [Negative Emotion] but strengthens their relationship.
31 - 40	When strolling through a marketplace, [the Protagonist] and [choose a relationship] come across a [Mysterious Item]. [Mysterious Stranger] appears just as they are looking at it and buys the item. The stranger then disappears into the crowd with the item. The mystery of what just transpired strengthens the relationship.
41 - 50	[choose a relationship] wants to go [Male Pastime or Female Pastime] and asks [the Protagonist] to come with. They find it [Positive Emotions] and enjoy each other's company.
51 - 60	[choose a relationship] finds a [Mundane Item] that someone has dropped by accident outside the local [City Location]. [the Protagonist] helps return the item to its rightful owner. It turns out to belong to [Ordinary Person].
61 - 70	[the Protagonist] comes across [Ordinary Person] and [choose a relationship]. The two are caught up in an angry argument. [the Protagonist] takes the side of [chosen relationship] and wins the argument. [chosen relationship] is grateful for the help.
71 - 80	While having dinner at a restaurant together, [choose a relationship] reveals a fascination with [Country] and its people. [the Protagonist] politely agrees it is a fascinating country. The relationship is strengthened.

Roll	Result
81 - 90	[the Protagonist] and [choose a relationship] help a [Blue Collar Profession] find their way to the local [City Location].
91 - 00	[the Protagonist] and [choose a relationship] spend a day [Male Pastime or Female Pastime]. The activity abruptly ended when they witness [Criminal Pastime]. They end up having to flee. [chosen relationship] finds the experience [Negative Emotion] but it strengthens their relationship.

IMPROVE AN EXISTING COMMUNITY BOND (1D100)

Before rolling on the table, define a preferred Pastime table for the Community. Choose "Male", "Female", "Criminal" or "Occult". This determines what Pastime table to roll on when required. In the 1920s, the default table is "Male Pastime".

After completing the Story, make a test for the current Community Bond rating $\times 5\%$. Deduct relevant bonuses that increase the chance of improvement from the product. If the roll is higher than the sum, the Community Bond value improves by 1.

Roll	Result
1 - 10	[the Protagonist], in an effort to improve relations with [Community Bond], helps out with arranging [preferred Pastime]. Make a skill test for [the Protagonist]'s skill in Administration. If the skill test is successful, increase the chance of improving the Bond by 1d10 %.
11 - 20	While at a meeting with prominent members of the [Community Bond], one of them publicly criticises [the Protagonist] for a past failure. A debate over what are the facts of the situation ensues. Make an Opposed skill test for [the Protagonist]'s skill in Persuade versus a skill of 50 %. If the Protagonist wins, increase the chance of improving the Bond by 1d10 %. Otherwise, decrease it by 1d10 %.

Roll	Result
21 - 30	[the Protagonist] unearths information that reflects very badly on one of the prominent members of [Community Bond]. The player may choose to let [the Protagonist] use the compromising information as leverage. If so, the Community Bond value automatically improves by 1 without the need for a Community Bond Rating roll. But [the Protagonist] has made an enemy of the blackmailed member.
31 - 40	While partaking in [preferred Pastime], [the Protagonist] gets acquainted with another member, [Ordinary Person]. If the next Downtime Activity chosen is Meet New People, [the Protagonist] may attempt to establish an Individual Bond with the other member. If so, it costs only 2 Downtime points.
41 - 50	[the Protagonist] is asked to accommodate and assist a guest of the [Community Bond]. The guest is a [Academic Profession] from [Country] and is [Mysterious Stranger].
51 - 60	In conjunction with a [preferred Pastime], [the Protagonist] is relied on to perform an urgent business. Make a skill test for [Skill]. If the skill test is successful, increase the chance of improving the Bond by 1d10 %. Otherwise, decrease it by 1d10 %.
61 - 70	A member of the [Community Bond] seeks out [the Protagonist] and asks him or her to hold a parcel for safekeeping. [the Protagonist] is instructed to deposit the parcel at a [City Location] if the member's life comes to a sudden end. Does [the Protagonist] agree to do so?
71 - 80	[the Protagonist] attempts to ingratiate him- or herself with prominent members of the [Community Bond]. Make a skill test for [the Protagonist]'s Charm skill. If the skill test is successful, increase the chance of improving the Bond by 1d10 %. If not, there is no change.

Roll	Result
81 - 90	While helping to clear out [Community Bond]'s storage from old rubble, [the Protagonist] comes across a/an [Occult Item]. Does [the Protagonist] steal the item for him- or herself or is it presented to other members of the [Community Bond]?
91 - 00	(☠️) A [preferred Pastime] goes sideways and tempers among the [Community Bond] run high. A fight breaks out. Make an Opposed skill test for [the Protagonist]'s skill in Unarmed Combat. If the skill test is successful, [the Protagonist] is unscathed. Otherwise, take 1D6 damage to HP.

REPLENISH RESOURCES (1D100)

After completing the Story, remove all check marks on the Protagonist's Resource checkboxes.

Roll	Result
1 - 10	[the Protagonist] takes some time to take inventory and replenish his or her equipment. Among the items, [the Protagonist] finds a [Mysterious Item] that was not there before. Where did it come from?
11 - 20	While visiting a department store, [Shady Character] strikes up a conversation with [the Protagonist]. For reasons unknown, the shady character brings up the subject of [Criminal Pastime]. Unnerved, [the Protagonist] leaves the store.
21 - 30	In an old storage box [the Protagonist] finds a [Mundane Item] that [the Protagonist] borrowed from a neighbour long ago and forgot to return.
31 - 40	[the Protagonist] visits a bank to sort out his or her economy. [the Protagonist] has a meeting with a bank employee and notices that a/an [Occult Item] is on prominent display in his office. Why on earth would the bank employee keep such a thing on display?
41 - 50	There is a knock on the door. It is a new neighbour introducing him- or herself. The neighbour is [Ordinary Person].

Roll	Result
51 - 60	While provisioning, [the Protagonist] notices [Shady Character] shoplifting in a department store. Calling the store personnel's attention to the situation, the shady character is apprehended. [the Protagonist] may have just made an enemy out of the shoplifter.
61 - 70	While provisioning, [the Protagonist] finds an old book on the subject of [Skill]. If the next Downtime Activity chosen is Improve a Skill, and [the Protagonist] attempts to improve [rolled Skill]. The book increases any skill gains by 1d6 additional % points.
71 - 80	While visiting a yard sale organised by [Mysterious Stranger], [the Protagonist] finds a [Mysterious Item]. Noticing the interest taken, the stranger insists on giving the item to [the Protagonist] for free.
81 - 90	While at home, [the Protagonist] is contacted by a man who claims to be a [Academic Profession] from a renowned seat of knowledge. The academic wants an interview. [the Protagonist] asks why he or she is of interest. The academic refuses to say. [the Protagonist] declines the interview.
91 - 00	One morning, [the Protagonist] notices [Ordinary Person] casually standing at a street corner outside where [the Protagonist] lives. The person stands there for hours looking at the Protagonist's building. Is [the Protagonist] under surveillance?

HEAL AND RECUPERATE (1d100)

After completing the Story, the Protagonist heals as many Hit Points as Downtime points spent. The regained points do not have to fully heal the Protagonist.

Roll	Result	Roll	Result
1 - 5	While recuperating [the Protagonist] becomes a fan of a radio serial. In the serial, [Shady Character] gets involved in a fantastic adventure involving [Criminal Pastime] and [Occult Pastime].	31 - 35	The doctor of [the Protagonist] requests a meeting. While discussing the health of [the Protagonist] and how to best improve it, the doctor becomes more and more personal. The doctor clearly wants more than a professional relationship with [the Protagonist]. Is that what [the Protagonist] wants too? If the next Downtime Activity chosen is Meet New People, [the Protagonist] may attempt to establish an Individual Bond with the doctor. If so, it costs only 2 Downtime points.
6 - 10	[the Protagonist] checks into a local hospital. One of the other patients, [Shady Character] turns out to be a [Criminal Profession]. The patient is open about his or her criminal lifestyle. Should [the Protagonist] be worried about the patient's honesty?	36 - 40	As part of recuperating, [the Protagonist] begins working out. The exercise is invigorating. If the next Downtime Activity chosen is Improve a Stat, and [the Protagonist] attempts to improve STR, CON or DEX, increase the chance of improving the Stat by an extra 1d10 %.
11 - 15	As part of recuperating, [the Protagonist] begins taking long strolls in the neighbourhood. The walks are invigorating and brisk. Apart from healing lost Hit Points, [the Protagonist] also regains 1 SAN.	41 - 45	[the Protagonist] spends a calm and rejuvenating time at a health spa. The experience leaves a feeling of [Positive Emotion]. In addition to healing lost Hit Points, [the Protagonist] regains 1 SAN.
16 - 20	While recuperating at home, [the Protagonist] begins feeding a stray cat from the neighbourhood. While the cat keeps a distance, the two become friends.	46 - 50	While recuperating at a hospital, [the Protagonist] gets on well with one of the nurses. The nurse asks if, once discharged, [the Protagonist] wants to go on an evening of [Female Pastime] with her. If the next Downtime Activity chosen is Meet New People, [the Protagonist] may attempt to establish an Individual Bond with the nurse. If so, it costs only 2 Downtime points.
21 - 25	While in the office of [the Protagonist]'s doctor, [the Protagonist] notices several books on occult subjects on the bookshelf. The books are about [Occult Pastime], [Occult Pastime] and [Occult Pastime]. Can [the Protagonist] trust this doctor?	51 - 55	[the Protagonist] spends a boring and uneventful time in a hospital ward, healing lost HP points.
26 - 30	(☠) While [the Protagonist] is recuperating at home, there is a knock on the front door. It turns out to be [Mysterious Stranger]. The stranger claims to need the help of [the Protagonist], but something is off. Somehow, it feels like a setup - a trap. [the Protagonist] slams the door shut, locks and barricades it. Did it really happen or was it all a bad dream? [the Protagonist] loses 1 SAN from sheer paranoia.	56 - 60	To pass the time while recuperating, [the Protagonist] reads books and literature and attends lectures and public debates. If the next Downtime Activity chosen is Improve a Stat, and [the Protagonist] attempts to improve INT, POW or CHA, increase the chance of improving the Stat by an extra 1d10 %.

Roll Result

61 - 65 (☠) The doctor mixes up the journal of [the Protagonist] with another patient's. Unless [the Protagonist] succeeds with a skill test for Alertness or Medicine (whichever has the highest skill value), the doctor will misdiagnose and cause [the Protagonist] to not heal 1d6 HP (up to the current damage to HP) at the end of the Activity.

66 - 70 While sitting in the waiting room for a check-up by a doctor, [Ordinary Person] takes a seat next to [the Protagonist] and the two begin talking. They get along really well. If the next Downtime Activity chosen is Meet New People, [the Protagonist] may attempt to establish an Individual Bond with the ordinary person. If so, it costs only 2 Downtime points.

71 - 75 [the Protagonist] spends a boring and uneventful time convalescing at home. The monotony is maddening.

76 - 80 While recuperating at a hospital, [the Protagonist] catches a glimpse of a strange children's ward. The children seem to always be playing with toys while supervised by men in white coats. The lead supervisor seems to be [Shady Character]. What is going on?

81 - 85 While recuperating at a hospital, a fellow patient offers to borrow [the Protagonist] a book on the subject of [Skill]. If the next Downtime Activity chosen is Improve a Skill, and [the Protagonist] attempts to improve [rolled Skill]. The book increases any skill gains by 1d6 additional % points.

86 - 90 While recuperating [the Protagonist] is contacted by a [Academic Profession], who is trying to locate a long lost [Occult Item]. When [the Protagonist] claims not to know anything, the academic is suddenly overcome by [Negative Emotion] and runs away from the interview.

Roll Result

91 - 95 While recuperating at home [the Protagonist] accidentally receives the neighbour's mail. Opening a letter by mistake reveals the neighbour as [Mysterious Stranger] with a deep interest in [Occult Pastime]. Should [the Protagonist] hand over the opened letter to the neighbour?

96 - 00 Looking out the window, [the Protagonist] witnesses what seems to be [Criminal Pastime]. When the police are contacted, they bluntly dismiss it as paranoid ramblings.

STUDY FORBIDDEN TOMES TO INCREASE UNNATURAL (1D100)

To be able to choose this Activity, the Protagonist must have access to a source of Mythos knowledge. This is usually a book, letters, scrolls, clay tablets or the like.

The Protagonist needs a skill of at least 20 % in the language of the Mythos account. The Study time of the Mythos account denotes the Downtime point cost to study it.

Study time Downtime point cost

Hours or Days	1 Downtime point
Weeks	5 Downtime points
Months	25 Downtime points

After completing the Story, the Protagonist makes an **Immersion test**: a roll against the Protagonist's current Unnatural skill × 10 with a negative modifier based on the account's weightiness (0 for entry-level information, up to -40 for accounts detailing the darkest secrets of the universe).

Potential Unnatural skill gain	Modifier to Immersion test
+1 to +3	0
+4 to +6	-10
+7 to +12	-20
+13 to +16	-30
+17 or more	-40
