THE COOK

Huddling under their cloaks, a rain-drenched band of adventurers watch as their human ranger sears a fresh leg of rabbit over the campfire. Though the going will be tough, they will at least have a hearty meal in their bellies to fuel them through the day.

Surveying the frigid wasteland before him, a fur clad gnome monk sets to work to prepare a hot meal for his companions. The warming soup he carefully stirs is sure to fortify them against the icy trek to come.

An Elven cleric kneels beside her injured friend. He lays semi-conscious against a tree as she carefully tends to his wounds. His groans cease suddenly, not because of her medical skills, but because she produces the last wildberry cookie from her shawl; his favourite!

A nourishing meal is equally as essential as a sturdy blade; for a warrior fighting with a wholesome breakfast in his stomach will always triumph over a starving foe. Nothing gives such a feeling of warmth and comfort in times of tribulation as a piping hot nutritious meal to put a difficult day to rest.

COOK'S UTENSILS

A cook who is devoted to their companions' welfare will always make space in their adventuring pack for the utensils necessary to throw together a flavoursome meal.

A set of cook's utensils will include a metal pot or pan, a chef's knife, a large spoon, some cutlery, a tinderbox and a few small jars of seasoning. Proficiency with this kit allows you to add your proficiency modifier to any wisdom (cooking) checks to make or prepare food. Additionally, proficiency with cook's utensils lets you create morsels and meals with bonus effects. Your knowledge of food preparation and culinary practice also gives you a some additional benefits that work in tandem with your other skills:

History: Your culinary studies have allowed you to learn of some of the food-based customs, stories and habits of various cultures and races. You can also attempt to duplicate meals if you have some information about them.

Investigation: You can more easily spot poisons, impurities, signs of spoilage and traces of tampering or foul play within foods and drinks.

Persuasion: It is easier for you to find out what foods are popular, traditional or sought after in different societies, regions or cultures.

Medicine: You may use your culinary skills to transform an oral medicine or poison that would otherwise taste foul into something more palatable. You can also mask their presence within other foods.

MORSELS

Sometimes, the only thing you need to make it over the next ridge or through the impending battle is a small treat to bolster morale or energise the body. To this effect, a cook may carry with them or quickly prepare a delicious morsel of food to distribute to the party in a moment of rest or refuge. Good examples of a morsel would be a biscuit, a piece of chocolate, some jerky, a small tart, a muffin, a sandwich, or some rations with additional spices or seasoning.

COOKING MORSELS

There are two ways to create morsels, the first is a **hasty morsel**, quickly put together during a short rest. The second is a **prepared morsel**, cooked during a period of downtime of 1 hour, either immediately before or after a long rest. A maximum of 8 morsels may be cooked in a single cooking session.

Hasty morsel: A hasty morsel may be cooked during a short rest. Creating a morsel consumes 1 ration per portion. The morsel does not need a fire to make, but it must be eaten during the rest in which it was made or they spoil, losing their effect.

Prepared Morsel: Prepared morsels must be cooked over a period of 1 hour either directly before or after a long rest. The cook must have access to 2gp worth of ingredients per portion. Cooking a prepared morsel requires a fire. Prepared morsels may last up to 5 days without spoilage.

MORSEL EFFECTS

Each time you cook a batch of morsels, you must choose a type from the list below, and apply it to the entire batch. A creature may only gain the benefits of a morsel once per long rest.

Nourishing Morsel: When consumed during a short rest, add a +1 modifier to each use of a hit dice until the rest finishes.

A prepared morsel restores additional hitpoints equal to the cook's proficiency modifier at the end of the rest, regardless of how many hit dice were expended.

Comforting Morsel: When consumed during a short rest, gain advantage on saving throws against the frightened condition for 1 hour.

A prepared morsel provides immunity to the frightened condition for 1 hour instead.

Invigorating Morsel: When consumed during a short rest, any creature suffering from the effects of exhaustion may act as though they have 1 point less exhaustion for 1 hour.

A prepared morsel also increases your movement speed by 5ft per turn for 1 hour. This bonus is not multiplicative, and must be added after all other modifiers.
