Recovery

Eat a Provision to recover 1d6 Stamina. You can do this up to 3 times per day.

When you rest for 8 hours, you can recover 2d6 Stamina and 2d6 Luck. Neither can exceed their starting values.

Advanced Skills & Spells:

Rank + Skill = Total

Rolling

To do most actions you'll be required to roll 2d6, adding them together, as a Roll Under or a Roll Versus.

Roll Under

Rolling Under is the throwing of 2d6 with the intention of scoring equal to or under a number. This will mainly be used in unopposed situations like climbing a wall or casting a Spell. Rolling two 6s always results in failure.

Roll Versus

The Roll Versus, mostly used for combat or other contests, occurs when two opponents each roll 2d6 and add any applicable bonuses and compare results, the higher total winning. In a duel, you might be rolling 2d6 and adding your Sword Fighting, looking to beat your opponent who is doing similar.

Getting Better

When you successfully use a Skill, put a tick next to it. The next time you have a chance to rest, you can test up to 3 Skills. If you roll 2d6 over your current Skill Total, increase it by 1. When you've finished testing, remove all ticks from your sheet.

Testing your Luck

To successfully Test your Luck, you must roll 2d6 with the intention of scoring equal to or less than your current Luck score. Every time you Test your Luck, reduce your current Luck score by 1 (regardless of whether the Test was successful or not). Testing your Luck is optional; you may always refuse to roll.

- In the case of a tie in a Roll Versus, you may Test your Luck to break it in your favour.
- When you successfully hit an opponent but before rolling for Damage, they may Test your Luck and, if successful, add 2 to your Damage Roll.

Fighting

To stab, bludgeon, or otherwise physically interfere with someone, Roll (2d6+applicable Skill Total) Versus an opponent doing the same thing. The winner Rolls for Damage, and the loser deducts the number generated by the Damage Roll from their Stamina. Note that either party in any exchange can potentially win. In a tie, both parties have avoided hurting each other. Also note that this means you can potentially hit an unlimited number of people in a Round but may only Initiate once per Turn.

Shooting an opponent is resolved by Rolling Versus their Skill or appropriate evasive Advanced Skill such as Shield or Dodge. When shooting into melee, on a successful hit, assign a number to every individual involved and roll a die. If their number comes up, they receive the Damage.

On your Turn, you may decide to take Aim with your ranged Weapon. To do so, hold onto your Initiative Token. When your next Initiative Token is drawn you may roll twice and pick the best roll. If the End of the Round Token comes up and you haven't used your Aim Token, you may decide to hold onto it for the next Round.

Armor, Weapons & Encumbrance

Beings can be Unarmored, Lightly Armoured, Modestly Armoured, or Heavily Armoured. Each modifies Damage Rolls by 0, -1, -2 and -3 respectively, to a minimum of 1. Armour takes up a number of item slots equal to twice its protective value.

You may carry twelve things without issue. Some items are of inconsequential individual weight, like arrows, and will only ever take up one slot unless you have an awful lot of them. Large items are anything you need both hands to hold. They take up two slots in your inventory (we recommend writing them at a jaunty angle to fill up the space).

If you find yourself carrying more than 12 items, you suffer -4 to all rolls due to the inconvenient weight. If you are carrying 18 items or more, you suffer -4 to all rolls, you can hardly move, and you count as Unawares for anyone wanting to stab you.

Retrieving an Item in a Hurry

If you need to get something from your inventory, roll 2d6 and score equal to or higher than its position on your list. If you succeed, you can pull it out and do what you intended. Otherwise, you spend your entire action finding it. Double 1s always indicate a failure. Retrieving an arrow counts as an item retrieval; make sure they're packed on top!
